

Start your journey

Find the path that suits you which can lead to exciting learning, future jobs and careers in STEM.

I want to help make change happen

I want to create solutions

I want to follow my interests

I want job security and recognition

SCAN ME

Where do you want to learn when you leave school?

On the job (technical)

- Apprenticeships
- Higher Technical Qualifications
- Occupational qualifications

80%
workplace based or more

Classroom and work placement (technical)

- T Level

Up to 20%
workplace based

In the classroom (academic)

- A levels / Highers
- IBacc/ BTec
- Entry levels

Work experience up to 2 weeks (or more)

Careers resources

Bring engineering to life with our inspiring resources and explore first steps into engineering careers.

Engineer your future

eukeducation.org.uk/engineer-your-future

Discover jobs and the range of rewards including the benefits of professional recognition

Tip: Invite people who work as engineers, scientists and technicians to present

Green careers posters

eukeducation.org.uk/green

Learn how careers in engineering make a difference

Tip: Use the full series and the postcards to explore green careers in engineering

Meet the future you quiz

mtfy.org.uk

Find out how skills and interests could lead to an exciting career in engineering

Tip: Use this resource in the classroom, as a homework task or at a careers fair

www.eukeducation.org.uk

Find your path...

Discover routes to become an engineer!

Jobs in engineering are in demand at all levels. From operative and technician or advanced technician, through to scientist and engineer.

There are many different routes into engineering. The options you choose could depend on what area you want to work in or how you like to learn.

thisisengineering.org.uk/become-an-engineer

Explore roles... become a technician

Technicians use their expert skills and knowledge to solve problems, fix things and make things work.
